

“Advanced Cyberinfrastructure Enabled Services and Applications in 2021”

**Keynote Presentation
NSF Workshop on Applications and Services in 2021
Washington, DC
January 28, 2016**

**Dr. Larry Smarr
Director, California Institute for Telecommunications and
Information Technology
Harry E. Gruber Professor,
Dept. of Computer Science and Engineering
Jacobs School of Engineering, UCSD**

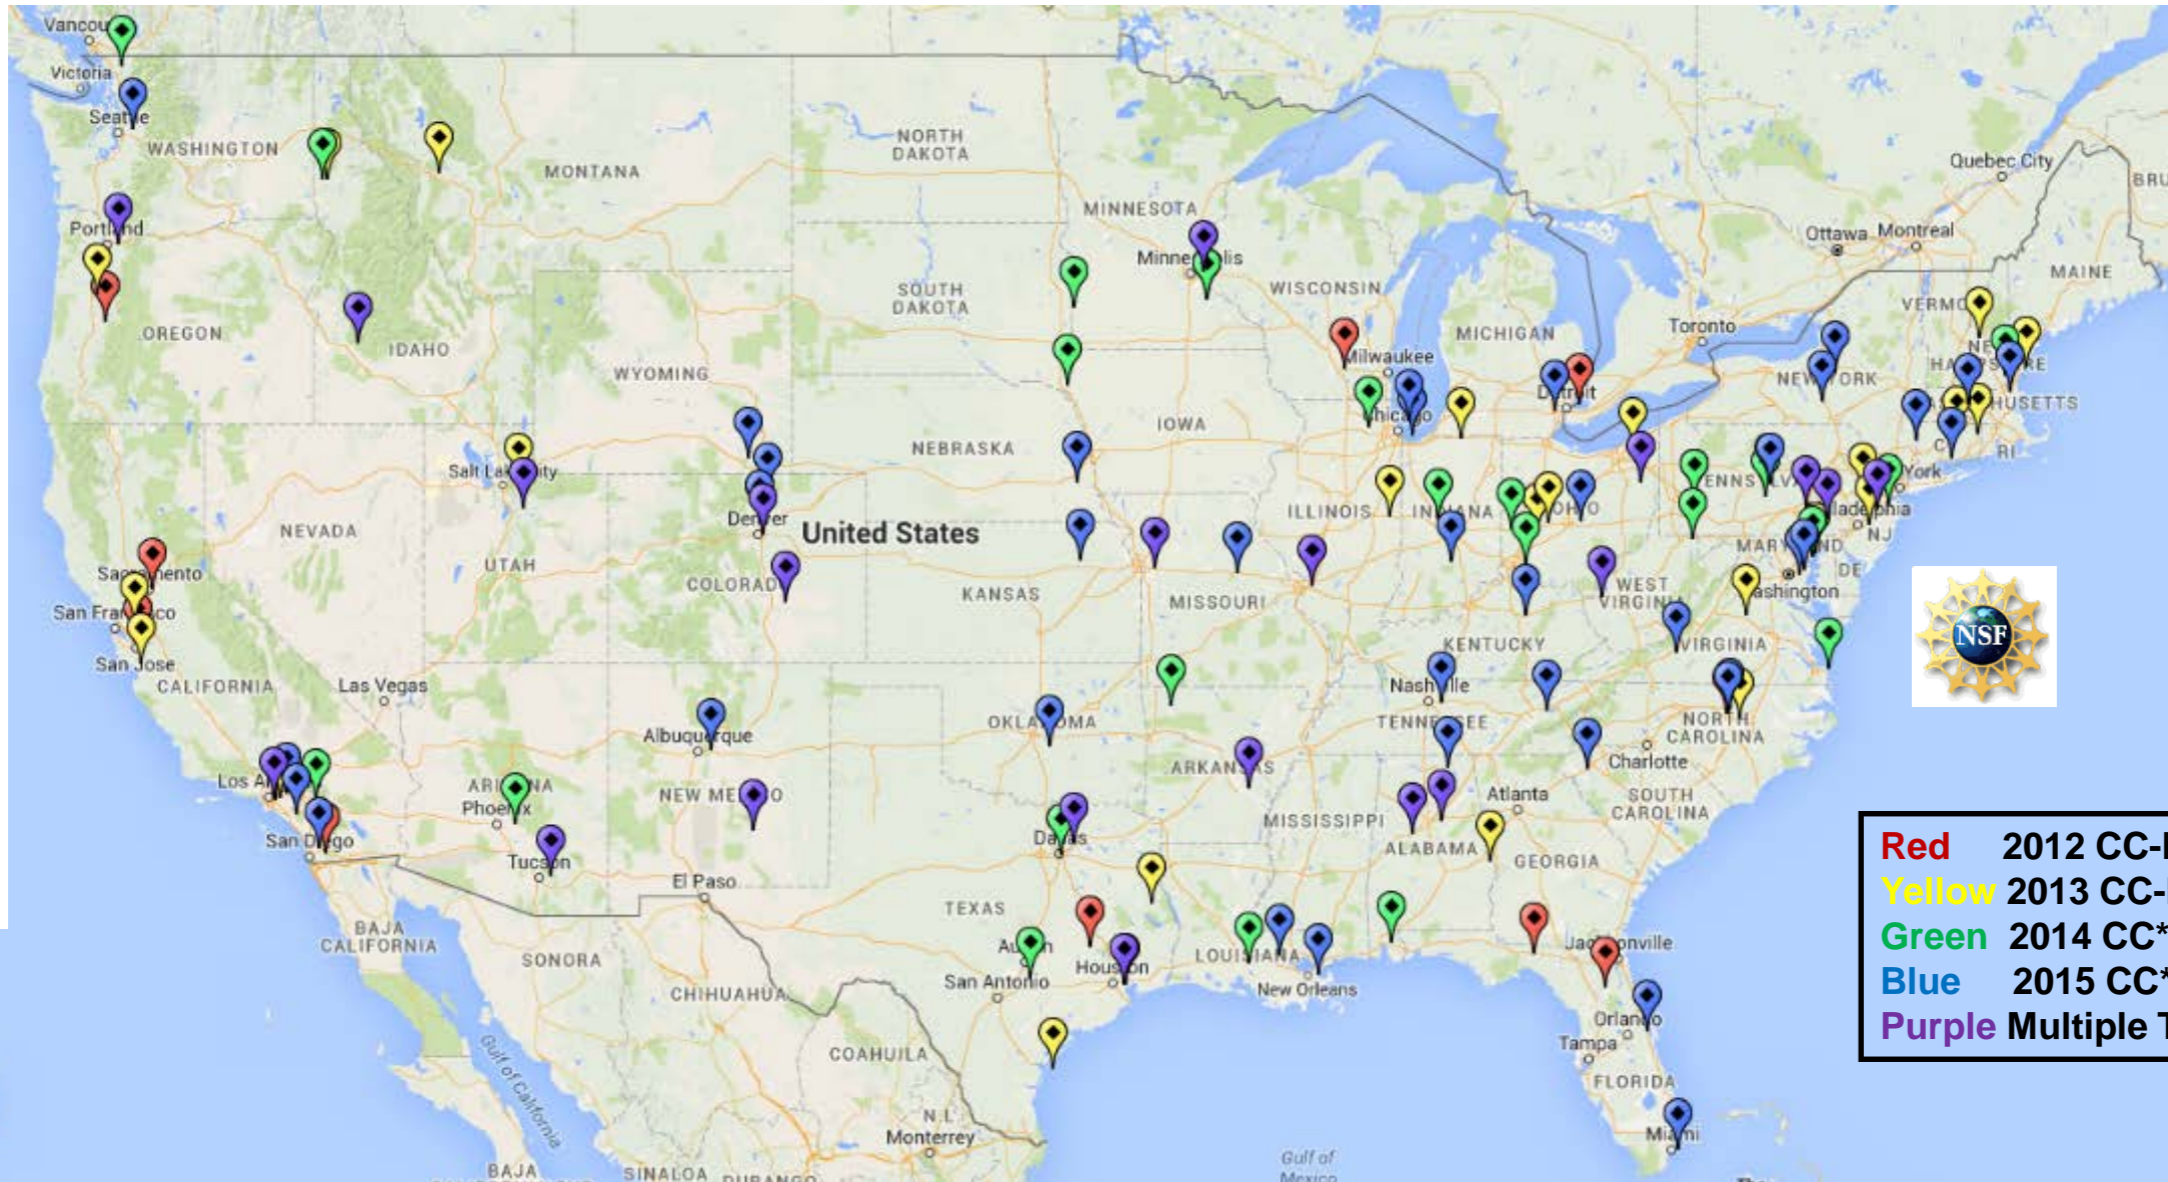

The Cyberinfrastructure of 2021 Will Be Radically Different from 2016

5G Will Enable a Wide Range of New Wireless Applications and Services Connecting People and Things

Higher user experienced data rate

Fiber-like access rate

Zero latency experience

Comparable to local operations

Excellent experience under various scenarios

Consistent experience under diverse scenarios

Typical Services

Mobile Internet services

UHD Video Streaming

Augmented Reality

Cloud Storage

Virtual Reality

IoT services

ITS

Surveillance

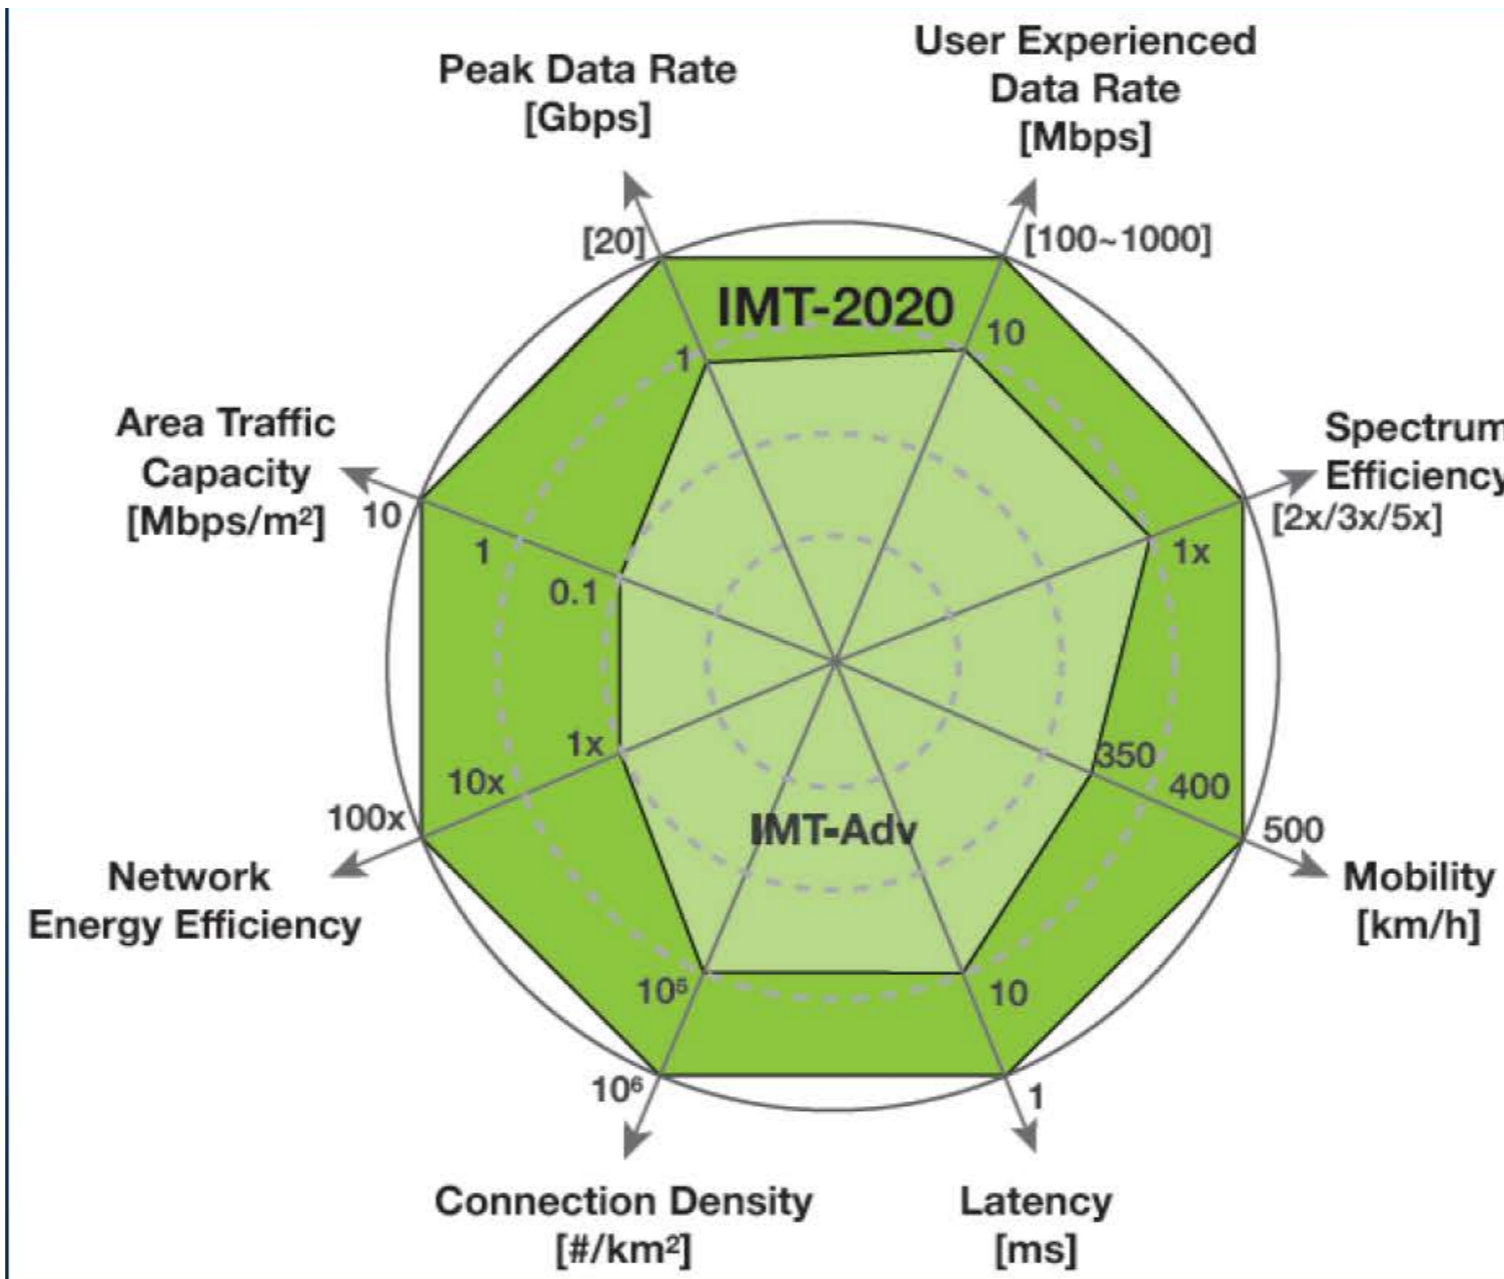

Smart Home

Smart Grid
